### DETAILED ACTION

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The terminology of "interior zone", "first area" and "second area" should be used and described in relation to the drawings if applicable (apparently with figure 5). No new matter should be entered.
2. Claims 1-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no disclosure in the originally filed specification (including the claims) of an "interior zone", "first area" and "second area" as currently in independent claims 1 and 17.

Please note that upon removal of the new matter the claims would be subject to the art rejection made in the first office action. No art rejection is being made in this office action.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Messal et al. in U.S. Patent No. 6,777,647 has a device with a laser and a fluid source.
